Subject: Hacienda Avenue Green Street Improvement Project 08-04

Dear Campbell Resident,

The City of Campbell is excited to announce that the construction of the Hacienda Avenue Green Street Improvement Project is coming soon. This project includes the re-grading and re-paving of the street, the installation of new curb, gutters, ADA ramps, sidewalk infill, bicycle lanes, landscaping, and LED streetlights.

The final design was approved by City Council last October. Bids are currently being solicited from qualified contractors. The City will be awarding the contract to the lowest responsive contractor in June, 2014. The construction of the project will begin shortly thereafter. It is anticipated that the construction of the project will take approximately one year.

During the duration of construction we ask for your patience as the project will undoubtedly create some disturbances to your normal routine. Whenever possible, Hacienda Avenue will remain open to two way traffic throughout construction, but there will be times when traffic will be delayed by construction activity. City staff will be working with the contractor to minimize inconveniences to the public.

The City will conduct additional outreach to disseminate more information once the City project contractor is on-board and more information regarding the roadway construction is available.

Next, utility companies will begin some required utility work along Hacienda Avenue in preparation for the upcoming roadway project. This work is expected to continue until June when the City project begins. The utility companies will provide more information detailing their construction activities to the affected residents.

For further information on the project, including updates and the anticipated project schedule, use the following link to the City's website:
